

24th February 2021

I can explain the features of a river

Make notes on each of the following:

- 1) Waterfall
- 2) Estuary
- 3) Current
- 4) Ox-bow lake
- 5) Mouth of the river
- 6) Tributaries
- 7) River bank
- 8) Basin
- 9) Flood plain
- 10) Confluence

What are they?

How are they formed?

Diagrams.

Then select three of the headings and explain them in more detail, using a picture to help explain what it is.

Waterfalls

Waterfalls are formed when ...

Ox-bow lakes

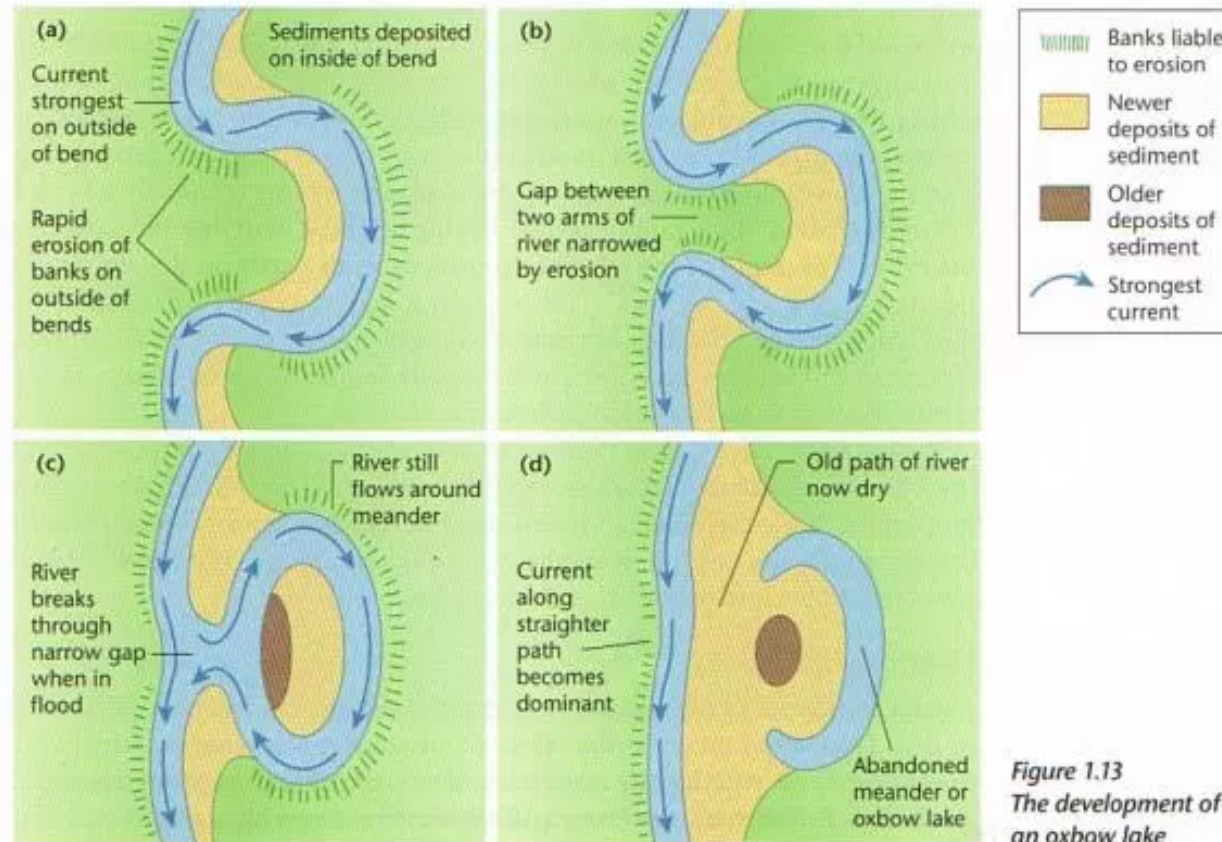

Figure 1.13
The development of
an oxbow lake
