

Year 6

Hope you are all well and managing to keep busy! I know you had a lot of work in your Year 6 pack, but if you have finished it or you would like a change of activities, I have added a few extra ones.

- The Year 6 Mental Maths tests are a quick and easy way to revise your maths skills. Get someone in your house to read the questions while you write the answer. The answers are on the question sheet, so you can mark them at the end.
- Maths Puzzles are lots of challenges to get you thinking, you might even do them with your siblings or your parents! There is an answer section so you can check them.

- The Mystery and The Elderly Man are to get the 'author' in you thinking. Read the opening and continue to story.
- Maths Challenges are lots of games and activities and some can be done with other people.
- There are lots of other Maths activities that are quite short too.
- If you are eager to keep moving, why not create your own short Circuit Training routine? Keep a record of your scores each time you do it. Try doing it with your siblings or your parents!

Hope to see you all soon.

Miss H x
