

Using the symbols for greater than, less than and equals.

< fewer than > greater than = equals

Put the symbol in the middle to make these statements correct.

$2 \times 4 \quad \dots \quad 3 \times 2$

$5 \times 10 \quad \dots \quad 4 \times 5$

$4 \times 2 \quad \dots \quad 5 \times 2$

$2 \times 10 \quad \dots \quad 5 \times 2$

$4 \times 1 \quad \dots \quad 2 \times 2$

$5 \times 5 \quad \dots \quad 10 \times 3$

$7 \times 2 \quad \dots \quad 3 \times 5$

$4 \times 10 \quad \dots \quad 6 \times 2$

$5 \times 4 \quad \dots \quad 10 \times 2$

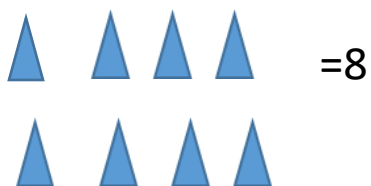

$2 \times 8 \quad \dots \quad 5 \times 3$

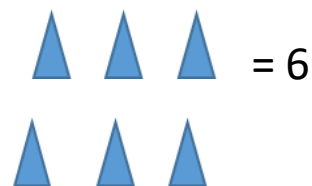

Imagine each answer is put on the scales, which number is greater or do they balance?

If you need to draw pictures to solve the problems you can draw arrays like this:

2×4

3×2

>
