

Follow these steps to make an African mask. If you would like an easier option, just paint the mask. If you would like a harder option, add the extra features.

1. Cut out the mask template and glue it to cardboard. Cut around the cardboard.

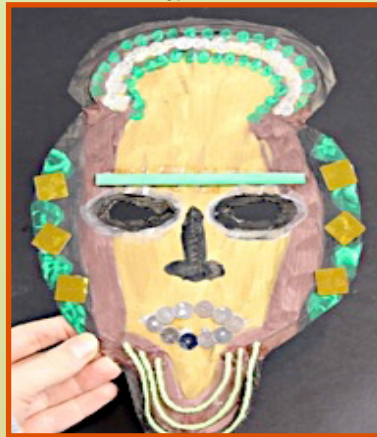

2. Ask a teacher for help to cut out the eyes. It can be difficult.

3. Choose the colours you want and paint your mask.

4. Add some colour and patterns to your mask.

5. For a challenge, use craft materials to add extra features to your mask.

6. For an extra challenge, find some materials to make a head piece.

7. Lolly sticks, feathers, straws, pipe cleaners and beads are great options.

8. When you have made your head pieces attach them to the mask with tape.

What colours will you use? What patterns will you make? Remember to look at the African Mask Images.
