

Wednesday, 27th January

- * Read the number sentences out loud.
- * Solve the problems using your fingers (if you find this too tricky, use pictures or objects).
- * Write the missing number in the number sentence and read it again.

$$5 - 1 =$$

$$4 - 2 =$$

$$7 - 2 =$$

$$8 - 3 =$$

$$10 - 2 =$$

Great job! Can you put a circle around the smallest number?
