

MATHS CURRICULUM

Year 1	2
Year 2	5
Year 3	9
Year 4	11
Year 5	15
Year 6	20

MATHS CURRICULUM

Year 1

The following table lists all year 1 national curriculum attainment targets and non statutory notes organised into national curriculum strands. The columns to the right indicate when and where the statements are taught. Red is used to indicate a statement that is not taught in year 1.

NC Year	NC Statement	GLF Year	GLF Unit
Number - number and place value			
Year 1	count to and across 100, forwards and backwards, beginning with 0 or 1, or from any given number	Year 1	Daily counting
Year 1	count, read and write numbers to 20 in numerals; count, read and write numbers to 100 in numerals; count in multiples of twos, fives and tens	Year 1 Year 2 Year 1	1.3, 1.4, 1.10 1.8, 1.9 Daily counting, 2.1
Year 1	given a number, identify one more and one less	Year 1	1.3, 1.4, 1.10
Year 1	identify and represent numbers using objects and pictorial representations including the number line, and use the language of: equal to, more than, less than (fewer), most, least	Year 1	1.3, 1.4, 1.10
Year 1	read and write numbers from 1 to 20 in numerals and words	Year 1	1.3, 1.4, 1.10
Year 1	Pupils practise counting (1, 2, 3...), ordering (for example, first, second, third...), and to indicate a quantity (for example, 3 apples, 2 centimetres), including solving simple concrete problems, until they are fluent.	Year 1	1.3, 1.4, 1.10
Year 1	Pupils begin to recognise place value in numbers beyond 20 by reading, writing, counting and comparing numbers up to 100, supported by objects and pictorial representations.	Year 2	1.8, 1.9
Year 1	They practise counting as reciting numbers and counting as enumerating objects, and counting in twos, fives and tens from different multiples to develop their recognition of patterns in the number system (for example, odd and even numbers), including varied and frequent practice through increasingly complex questions.	Year 1	Daily counting, 2.1
Year 1	They recognise and create repeating patterns with objects and with shapes.	Year 1	Geo. P of Shape
Number - addition and subtraction			
Year 1	read, write and interpret mathematical statements involving addition (+), subtraction (−) and equals (=) signs	Year 1	1.5, 1.6, 1.7
Year 1	represent and use number bonds and related subtraction facts within 20	Year 2	1.11, daily fluency
Year 1	add and subtract one-digit and two-digit numbers to 20, including zero	Year 2	1.11, 1.13
Year 1	solve one-step problems that involve addition and subtraction, using concrete objects and pictorial representations, and missing number problems such as $7 = \square - 9$.	Year 1	1.5, 1.6, 1.7
Year 1	Pupils memorise and reason with number bonds to 10 and 20 in several forms (for example, $9 + 7 = 16$; $16 - 7 = 9$; $7 = 16 - 9$). They should realise the effect of adding or subtracting zero. This establishes addition and subtraction as related operations.	Year 1	1.3, 1.4, 1.10 Daily fluency
Year 1	Pupils combine and increase numbers, counting forwards and backwards.	Year 1	Daily counting
Year 1	They discuss and solve problems in familiar practical contexts, including using quantities. Problems should include the terms: put together, add, altogether, total, take away, distance between, difference between, more than and less than, so that pupils develop the concept of addition and subtraction and are enabled to use these operations flexibly.	Year 1	1.5, 1.6, 1.7
Number - multiplication and division			
Year 1	solve one-step problems involving multiplication and division, by calculating the answer using concrete objects, pictorial representations and arrays with the support of the teacher.	Year 2	2.2, 2.3, 2.4, 2.5, 2.6

MATHS CURRICULUM

Year 1	Through grouping and sharing small quantities, pupils begin to understand: multiplication and division; doubling numbers and quantities; and finding simple fractions of objects, numbers and quantities.	Year 2	2.2, 2.3, 2.4, 2.5, 2.6
Year 1	They make connections between arrays, number patterns, and counting in twos, fives and tens.	Year 1	2.1
Number - fractions			
Year 1	recognise, find and name a half as one of two equal parts of an object, shape or quantity	Year 1	Fractions
Year 1	recognise, find and name a quarter as one of four equal parts of an object, shape or quantity.	Year 1	Fractions
Year 1	Pupils are taught half and quarter as 'fractions of' discrete and continuous quantities by solving problems using shapes, objects and quantities. For example, they could recognise and find half a length, quantity, set of objects or shape. Pupils connect halves and quarters to the equal sharing and grouping of sets of objects and to measures, as well as recognising and combining halves and quarters as parts of a whole.	Year 1	Fractions
Measurement			
Year 1	compare, describe and solve practical problems for:		
Year 1	lengths and heights [for example, long/short, longer/shorter, tall/short, double/half]	Year 1	1.10
Year 1	mass/weight [for example, heavy/light, heavier than, lighter than]	Year 1	M/ment mass & vol
Year 1	capacity and volume [for example, full/empty, more than, less than, half, half full, quarter]	Year 1	M/ment mass & vol
Year 1	time [for example, quicker, slower, earlier, later]	Year 1	M/ment - time
Year 1	measure and begin to record the following:		
Year 1	lengths and heights	Year 1	1.10
Year 1	mass/weight	Year 1	M/ment mass & vol
Year 1	capacity and volume	Year 1	M/ment mass & vol
Year 1	time (hours, minutes, seconds)	Year 1	M/ment - time
Year 1	recognise and know the value of different denominations of coins and notes	Year 1	2.1
Year 1	sequence events in chronological order using language [for example, before and after, next, first, today, yesterday, tomorrow, morning, afternoon and evening]	Year 1	M/ment - time
Year 1	recognise and use language relating to dates, including days of the week, weeks, months and years	Year 1	M/ment - time
Year 1	tell the time to the hour and half past the hour and draw the hands on a clock face to show these times.	Year 1	M/ment - time
Year 1	The pairs of terms: mass and weight, volume and capacity, are used interchangeably at this stage.	Year 1	M/ment mass & vol
Year 1	Pupils move from using and comparing different types of quantities and measures using non-standard units, including discrete (for example, counting) and continuous (for example, liquid) measurement, to using manageable common standard units.	Year 1	M/ment - all
Year 1	In order to become familiar with standard measures, pupils begin to use measuring tools such as a ruler, weighing scales and containers.	Year 1	M/ment - all
Year 1	Pupils use the language of time, including telling the time throughout the day, first using o'clock and then half past	Year 1	M/ment - time
Geometry - properties of shape			

MATHS CURRICULUM

Year 1	recognise and name common 2-D and 3-D shapes, including:		
Year 1	2-D shapes [for example, rectangles (including squares), circles and triangles]	Year 1	Geo. P of Shape
Year 1	3-D shapes [for example, cuboids (including cubes), pyramids and spheres].	Year 1	Geo. P of Shape
Year 1	Pupils handle common 2-D and 3-D shapes, naming these and related everyday objects fluently. They recognise these shapes in different orientations and sizes, and know that rectangles, triangles, cuboids and pyramids are not always similar to each other.	Year 1	Geo. P of Shape
Geometry - position and direction			
Year 1	describe position, direction and movement, including whole, half, quarter and three quarter turns	Year 1	Geo. Pos & Dir
Year 1	Pupils use the language of position, direction and motion, including: left and right, top, middle and bottom, on top of, in front of, above, between, around, near, close and far, up and down, forwards and backwards, inside and outside.	Year 1	Geo. Pos & Dir
Year 1	Pupils make whole, half, quarter and three-quarter turns in both directions and connect turning clockwise with movement on a clock face.	Year 1	Geo. Pos & Dir

MATHS CURRICULUM

Year 2

The following table lists all year 2 national curriculum attainment targets and non statutory notes organised into national curriculum strands. The columns to the right indicate when and where the statements are taught. Red is used to indicate a statement that is not taught in year 2.

NC Year	NC Statement	GLF Year	GLF Unit
Number - number and place value			
Year 2	count in steps of 2, 3, and 5 from 0, and in tens from any number, forward and backward	Year 2	Daily counting
Year 2	recognise the place value of each digit in a two-digit number (tens, ones)	Year 2	1.8, 1.9
Year 2	identify, represent and estimate numbers using different representations, including the number line	Year 2	1.8, 1.9
Year 2	compare and order numbers from 0 up to 100; use <, > and = signs	Year 2	1.8, 1.9
Year 2	read and write numbers to at least 100 in numerals and in words	Year 2	1.8, 1.9
Year 2	use place value and number facts to solve problems.	Year 2	1.8, 1.9
Year 2	Using materials and a range of representations, pupils practise counting, reading, writing and comparing numbers to at least 100 and solving a variety of related problems to develop fluency. They count in multiples of three to support their later understanding of a third.	Year 2	1.8, 1.9
Year 2	As they become more confident with numbers up to 100, pupils are introduced to larger numbers to develop further their recognition of patterns within the number system and represent them in different ways, including spatial representations.	Year 2	1.8, 1.9
Year 2	Pupils should partition numbers in different ways (for example, $23 = 20 + 3$ and $23 = 10 + 13$) to support subtraction. They become fluent and apply their knowledge of numbers to reason with, discuss and solve problems that emphasise the value of each digit in two-digit numbers. They begin to understand zero as a place holder.	Year 2	1.8, 1.9
Number - addition and subtraction			
Year 2	solve problems with addition and subtraction:		
Year 2	using concrete objects and pictorial representations, including those involving numbers, quantities and measures	Year 2	1.11, 1.12, 1.13, 1.14, 1.15, 1.16
Year 2	applying their increasing knowledge of mental and written methods	Year 2	1.11, 1.12, 1.13, 1.14, 1.15, 1.16
Year 2	recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100	Year 2 Year 3	Daily fluency 1.17
Year 2	add and subtract numbers using concrete objects, pictorial representations, and mentally, including:		
Year 2	a two-digit number and ones	Year 2	1.13
Year 2	a two-digit number and tens	Year 2	1.14
Year 2	two two-digit numbers	Year 2	1.15, 1.16
Year 2	adding three one-digit numbers	Year 2	1.11
Year 2	show that addition of two numbers can be done in any order (commutative) and subtraction of one number from another cannot	Year 2	1.11
Year 2	recognise and use the inverse relationship between addition and subtraction and use this to check calculations and solve missing number problems.	Year 1	1.6

MATHS CURRICULUM

Year 2	Pupils extend their understanding of the language of addition and subtraction to include sum and difference.	Year 2	1.11, 1.12, 1.13, 1.14, 1.15, 1.16
Year 2	Pupils practise addition and subtraction to 20 to become increasingly fluent in deriving facts such as using $3 + 7 = 10$; $10 - 7 = 3$ and $7 = 10 - 3$ to calculate $30 + 70 = 100$; $100 - 70 = 30$ and $70 = 100 - 30$. They check their calculations, including by adding to check subtraction and adding numbers in a different order to check addition (for example, $5 + 2 + 1 = 1 + 5 + 2 = 1 + 2 + 5$). This establishes commutativity and associativity of addition.	Year 2	1.11, 1.13, 1.14, 1.15, 1.16
Year 2	Recording addition and subtraction in columns supports place value and prepares for formal written methods with larger numbers.	Year 2	1.15, 1.16
Number - multiplication and division			
Year 2	recall and use multiplication and division facts for the 2, 5 and 10 multiplication tables, including recognising odd and even numbers	Year 2 Year 2	2.3, 2.4, 2.5, 2.6 1.10
Year 2	calculate mathematical statements for multiplication and division within the multiplication tables and write them using the multiplication ($\times$), division ($\div$) and equals ($=$) signs	Year 2	2.3, 2.4, 2.5, 2.6
Year 2	show that multiplication of two numbers can be done in any order (commutative) and division of one number by another cannot	Year 2 Year 2	2.3, 2.5 2.6
Year 2	solve problems involving multiplication and division, using materials, arrays, repeated addition, mental methods, and multiplication and division facts, including problems in contexts	Year 2	2.3, 2.4, 2.5, 2.6
Year 2	Pupils use a variety of language to describe multiplication and division.	Year 2	2.3, 2.4, 2.5, 2.6
Year 2	Pupils are introduced to the multiplication tables. They practise to become fluent in the 2, 5 and 10 multiplication tables and connect them to each other. They connect the 10 multiplication table to place value, and the 5 multiplication table to the divisions on the clock face. They begin to use other multiplication tables and recall multiplication facts, including using related division facts to perform written and mental calculations.	Year 2	2.3, 2.4, 2.5, 2.6
Year 2	Pupils work with a range of materials and contexts in which multiplication and division relate to grouping and sharing discrete and continuous quantities, to arrays and to repeated addition. They begin to relate these to fractions and measures (for example, $40 \div 2 = 20$, 20 is a half of 40). They use commutativity and inverse relations to develop multiplicative reasoning (for example, $4 \times 5 = 20$ and $20 \div 5 = 4$).	Year 2	2.3, 2.4, 2.5, 2.6
Number - fractions			
Year 2	recognise, find, name and write fractions $1/3$, $1/3$, $2/3$ and $3/4$ of a length, shape, set of objects or quantity	Year 2	Fractions
Year 2	write simple fractions for example, $1/2$ of $6 = 3$ and recognise the equivalence of $2/4$ and $1/2$.	Year 2	Fractions
Year 2	Pupils use fractions as 'fractions of' discrete and continuous quantities by solving problems using shapes, objects and quantities. They connect unit fractions to equal sharing and grouping, to numbers when they can be calculated, and to measures, finding fractions of lengths, quantities, sets of objects or shapes. They meet $3/4$ as the first example of a non-unit fraction.	Year 2	Fractions
Year 2	Pupils should count in fractions up to 10, starting from any number and using the $1/2$ and $2/4$ equivalence on the number line (for example, $1 \frac{1}{4}$, $2 \frac{2}{4}$ (or $1 \frac{1}{2}$), $1 \frac{3}{4}$, 2). This reinforces the concept of fractions as numbers and that they can add up to more than one.	Year 2	Fractions
Measurement			
Year 2	choose and use appropriate standard units to estimate and measure length/height in any direction (m/cm); mass (kg/g); temperature ($^{\circ}\text{C}$); capacity (litres/ml) to the nearest appropriate unit, using rulers, scales, thermometers and measuring vessels	Year 2	Measurement
Year 2	compare and order lengths, mass, volume/capacity and record the results using $>$, $<$ and $=$	Year 2	Measurement
Year 2	recognise and use symbols for pounds (£) and pence (p); combine amounts to make a particular value	Year 2	Money

MATHS CURRICULUM

Year 2	find different combinations of coins that equal the same amounts of money	Year 2	Money
Year 2	solve simple problems in a practical context involving addition and subtraction of money of the same unit, including giving change	Year 2	Money
Year 2	compare and sequence intervals of time	Year 2	Time
Year 2	tell and write the time to five minutes, including quarter past/to the hour and draw the hands on a clock face to show these times	Year 2	Time
Year 2	know the number of minutes in an hour and the number of hours in a day.	Year 2	Time
Year 2	Pupils use standard units of measurement with increasing accuracy, using their knowledge of the number system. They use the appropriate language and record using standard abbreviations.	Year 2	Measurement
Year 2	Comparing measures includes simple multiples such as 'half as high'; 'twice as wide'.	Year 2	Measurement
Year 2	They become fluent in telling the time on analogue clocks and recording it.	Year 2	Time
Year 2	Pupils become fluent in counting and recognising coins. They read and say amounts of money confidently and use the symbols £ and p accurately, recording pounds and pence separately	Year 2	Money
Geometry - properties of shape			
Year 2	identify and describe the properties of 2-D shapes, including the number of sides and line symmetry in a vertical line	Year 2	Properties of Shape
Year 2	identify and describe the properties of 3-D shapes, including the number of edges, vertices and faces	Year 2	Properties of Shape
Year 2	identify 2-D shapes on the surface of 3-D shapes, [for example, a circle on a cylinder and a triangle on a pyramid]	Year 2	Properties of Shape
Year 2	compare and sort common 2-D and 3-D shapes and everyday objects	Year 2	Properties of Shape
Year 2	Pupils handle and name a wide variety of common 2-D and 3-D shapes including: quadrilaterals and polygons, and cuboids, prisms and cones, and identify the properties of each shape (for example, number of sides, number of faces). Pupils identify, compare and sort shapes on the basis of their properties and use vocabulary precisely, such as sides, edges, vertices and faces.	Year 2	Properties of Shape
Year 2	Pupils read and write names for shapes that are appropriate for their word reading and spelling.	Year 2	Properties of Shape
Year 2	Pupils draw lines and shapes using a straight edge.	Year 2	Properties of Shape
Geometry - position and direction			
Year 2	order and arrange combinations of mathematical objects in patterns and sequences	Year 2	Pos and Direction
Year 2	use mathematical vocabulary to describe position, direction and movement, including movement in a straight line and distinguishing between rotation as a turn and in terms of right angles for quarter, half and three-quarter turns (clockwise and anticlockwise)	Year 2	Pos and Direction
Year 2	Pupils should work with patterns of shapes, including those in different orientations.	Year 2	Pos and Direction
Year 2	Pupils use the concept and language of angles to describe 'turn' by applying rotations, including in practical contexts (for example, pupils themselves moving in turns, giving instructions to other pupils to do so, and programming robots using instructions given in right angles).	Year 2	Pos and Direction
Statistics			
Year 2	interpret and construct simple pictograms, tally charts, block diagrams and simple tables	Year 2	Science
Year 2	ask and answer simple questions by counting the number of objects in each category and sorting the categories by quantity	Year 2	Science
Year 2	ask and answer questions about totalling and comparing categorical data	Year 2	Science

MATHS CURRICULUM

Year 2	Pupils record, interpret, collate, organise and compare information (for example, using many-to-one correspondence in pictograms with simple ratios 2, 5, 10).	Year 2	Science
--------	--	--------	---------

Year 3

The following table lists all year 3 national curriculum attainment targets and non statutory notes organised into national curriculum strands. The columns to the right indicate when and where the statements are taught. **Red** is used to indicate a statement that is not taught in year 3.

NC Year	NC Statement	GLF Year	GLF Unit
Number - number and place value			
Year 3	count from 0 in multiples of 4, 8, 50 and 100; find 10 or 100 more or less than a given number	Year 3 Year 3	Daily counting 1.17, 1.18
Year 3	recognise the place value of each digit in a three-digit number (hundreds, tens, ones)	Year 3	1.18
Year 3	compare and order numbers up to 1000	Year 3	1.18
Year 3	identify, represent and estimate numbers using different representations	Year 3	1.18
Year 3	read and write numbers up to 1000 in numerals and in words	Year 3	1.18
Year 3	solve number problems and practical problems involving these ideas	Year 3	1.18
Year 3	Pupils now use multiples of 2, 3, 4, 5, 8, 10, 50 and 100.	Year 3	Daily counting
Year 3	They use larger numbers to at least 1000, applying partitioning related to place value using varied and increasingly complex problems, building on work in year 2 (for example, $146 = 100 + 40$ and 6 , $146 = 130 + 16$).	Year 3	1.18
Year 3	Using a variety of representations, including those related to measure, pupils continue to count in ones, tens and hundreds, so that they become fluent in the order and place value of numbers to 1000.	Year 3	1.18
Number - addition and subtraction			
Year 3	add and subtract numbers mentally, including:		
Year 3	a three-digit number and ones	Year 3	1.19
Year 3	a three-digit number and tens	Year 3	1.19
Year 3	a three-digit number and hundreds	Year 3	1.19
Year 3	add and subtract numbers with up to three digits, using formal written methods of columnar addition and subtraction	Year 3	1.20, 1.21
Year 3	estimate the answer to a calculation and use inverse operations to check answers	Year 3	1.19, 1.20, 1.21
Year 3	solve problems, including missing number problems, using number facts, place value, and more complex addition and subtraction	Year 3	1.19, 1.20, 1.21
Year 3	Pupils practise solving varied addition and subtraction questions. For mental calculations with two-digit numbers, the answers could exceed 100.	Year 3	1.19
Year 3	Pupils use their understanding of place value and partitioning, and practise using columnar addition and subtraction with increasingly large numbers up to three digits to become fluent (see Mathematics Appendix 1).	Year 3	1.20, 1.21
Number - multiplication and division			
Year 3	recall and use multiplication and division facts for the 3, 4 and 8 multiplication tables	Year 4 Year 3	2.8 2.7
Year 3	write and calculate mathematical statements for multiplication and division using the multiplication tables that they know,	Year 3	2.7

MATHS CURRICULUM

	including for two-digit numbers times one-digit numbers, using mental and progressing to formal written methods	Year 5	2.14, 2.15
Year 3	solve problems, including missing number problems, involving multiplication and division, including positive integer scaling problems and correspondence problems in which n objects are connected to m objects	Year 5	2.17
Year 3	Pupils continue to practise their mental recall of multiplication tables when they are calculating mathematical statements in order to improve fluency. Through doubling, they connect the 2, 4 and 8 multiplication tables.	Year 3	2.7
Year 3	Pupils develop efficient mental methods, for example, using commutativity and associativity (for example, $4 \times 12 \times 5 = 4 \times 5 \times 12 = 20 \times 12 = 240$) and multiplication and division facts (for example, using $3 \times 2 = 6$, $6 \div 3 = 2$ and $2 = 6 \div 3$) to derive related facts (for example, $30 \times 2 = 60$, $60 \div 3 = 20$ and $20 = 60 \div 3$).	Year 5	2.14, 2.15
Year 3	Pupils develop reliable written methods for multiplication and division, starting with calculations of two-digit numbers by one-digit numbers and progressing to the formal written methods of short multiplication and division.	Year 5	2.14, 2.15
Year 3	Pupils solve simple problems in contexts, deciding which of the four operations to use and why. These include measuring and scaling contexts, (for example, four times as high, eight times as long etc.) and correspondence problems in which m objects are connected to n objects (for example, 3 hats and 4 coats, how many different outfits?; 12 sweets shared equally between 4 children; 4 cakes shared equally between 8 children).	Year 5 Year 6	2.17 2.27
Number - fractions			
Year 3	count up and down in tenths; recognise that tenths arise from dividing an object into 10 equal parts and in dividing one-digit numbers or quantities by 10	Year 5	1.23
Year 3	recognise, find and write fractions of a discrete set of objects: unit fractions and non unit fractions with small denominators	Year 3	3.2, 3.3
Year 3	recognise and use fractions as numbers: unit fractions and non-unit fractions with small denominators	Year 3	3.2, 3.3
Year 3	recognise and show, using diagrams, equivalent fractions with small denominators	Year 5	3.7
Year 3	add and subtract fractions with the same denominator within one whole [for example, $5/7 + 1/7 = 6/7$]	Year 3	3.4
Year 3	compare and order unit fractions, and fractions with the same denominators	Year 3	3.2, 3.3
Year 3	solve problems that involve all of the above.	Year 3	3.2, 3.3, 3.4
Year 3	Pupils connect tenths to place value, decimal measures and to division by 10.	Year 5	1.23
Year 3	They begin to understand unit and non-unit fractions as numbers on the number line, and deduce relations between them, such as size and equivalence. They should go beyond the [0, 1] interval, including relating this to measure.	Year 3	3.2, 3.3
Year 3	Pupils understand the relation between unit fractions as operators (fractions of), and division by integers.	Year 3	3F2
Year 3	They continue to recognise fractions in the context of parts of a whole, numbers, measurements, a shape, and unit fractions as a division of a quantity.	Year 3	3.2, 3.3, 3F2
Year 3	Pupils practise adding and subtracting fractions with the same denominator through a variety of increasingly complex problems to improve fluency.	Year 3	3.4
Measurement			
Year 3	measure, compare, add and subtract: lengths (m/cm/mm); mass (kg/g); volume/capacity (l/ml)	Year 3	1.17, 1.18

MATHS CURRICULUM

Year 3	measure the perimeter of simple 2-D shapes	Year 4	2.16
Year 3	add and subtract amounts of money to give change, using both £ and p in practical contexts	Year 5	1.25
Year 3	tell and write the time from an analogue clock, including using Roman numerals from I to XII, and 12-hour and 24-hour clocks	Year 3	Time
Year 3	estimate and read time with increasing accuracy to the nearest minute; record and compare time in terms of seconds, minutes and hours; use vocabulary such as o'clock, a.m./p.m., morning, afternoon, noon and midnight	Year 3	Time
Year 3	know the number of seconds in a minute and the number of days in each month, year and leap year	Year 3	Time
Year 3	compare durations of events [for example to calculate the time taken by particular events or tasks].	Year 3	Time
Year 3	Pupils continue to measure using the appropriate tools and units, progressing to using a wider range of measures, including comparing and using mixed units (for example, 1 kg and 200g) and simple equivalents of mixed units (for example, 5m = 500cm).	Year 3	1.17, 1.18
Year 3	The comparison of measures includes simple scaling by integers (for example, a given quantity or measure is twice as long or five times as high) and this connects to multiplication.	Year 5	2.17
Year 3	Pupils continue to become fluent in recognising the value of coins, by adding and subtracting amounts, including mixed units, and giving change using manageable amounts. They record £ and p separately. The decimal recording of money is introduced formally in year 4.	Year 5	1.25
Year 3	Pupils use both analogue and digital 12-hour clocks and record their times. In this way they become fluent in and prepared for using digital 24-hour clocks in year 4.	Year 3	Time
Geometry - properties of shape			
Year 3	draw 2-D shapes and make 3-D shapes using modelling materials; recognise 3-D shapes in different orientations and describe them	Year 3	Geo. P of shape
Year 3	recognise angles as a property of shape or a description of a turn	Year 3	Geo. P of shape
Year 3	identify right angles, recognise that two right angles make a half-turn, three make three quarters of a turn and four a complete turn; identify whether angles are greater than or less than a right angle	Year 3	Geo. P of shape
Year 3	identify horizontal and vertical lines and pairs of perpendicular and parallel lines.	Year 3	Geo. P of shape
Year 3	Pupils' knowledge of the properties of shapes is extended at this stage to symmetrical and non-symmetrical polygons and polyhedra. Pupils extend their use of the properties of shapes. They should be able to describe the properties of 2-D and 3-D shapes using accurate language, including lengths of lines and acute and obtuse for angles greater or lesser than a right angle.	Year 3	Geo. P of shape
Year 3	Pupils connect decimals and rounding to drawing and measuring straight lines in centimetres, in a variety of contexts	Year 5	1.23
Statistics			
Year 3	interpret and present data using bar charts, pictograms and tables	Year 3	Science
Year 3	solve one-step and two-step questions [for example, 'How many more?' and 'How many fewer?'] using information presented in scaled bar charts and pictograms and tables.	Year 3	Science
Year 3	Pupils understand and use simple scales (for example, 2, 5, 10 units per cm) in pictograms and bar charts with increasing accuracy.	Year 3	Science
Year 3	They continue to interpret data presented in many contexts.	Year 3	Science

MATHS CURRICULUM

Year 4

The following table lists all year 4 national curriculum attainment targets and non statutory notes organised into national curriculum strands. The columns to the right indicate when and where the statements are taught. Red is used to indicate a statement that is not taught in year 4.

NC Year	NC Statement	GLF Year	GLF Unit
Number - number and place value			
Year 4	count in multiples of 6, 7, 9, 25 and 1000	Year 4	Daily counting
Year 4	find 1000 more or less than a given number	Year 4	1.22
Year 4	count backwards through zero to include negative numbers	Year 5	Daily counting 1.27
Year 4	recognise the place value of each digit in a four-digit number (thousands, hundreds, tens, and ones)	Year 4	1.22
Year 4	order and compare numbers beyond 1000	Year 4	1.22
Year 4	identify, represent and estimate numbers using different representations	Year 4	1.22
Year 4	round any number to the nearest 10, 100 or 1000	Year 4	1.22
Year 4	solve number and practical problems that involve all of the above and with increasingly large positive numbers	Year 4	1.22
Year 4	read Roman numerals to 100 (I to C) and know that over time, the numeral system changed to include the concept of zero and place value.	Year X	History
Year 4	Using a variety of representations, including measures, pupils become fluent in the order and place value of numbers beyond 1000, including counting in tens and hundreds, and maintaining fluency in other multiples through varied and frequent practice.	Year 4	1.22
Year 4	They begin to extend their knowledge of the number system to include the decimal numbers and fractions that they have met so far.	Year 5	1.23, 1.24
Year 4	They connect estimation and rounding numbers to the use of measuring instruments.	Year 4	1.22
Year 4	Roman numerals should be put in their historical context so pupils understand that there have been different ways to write whole numbers and that the important concepts of zero and place value were introduced over a period of time.	Year X	History
Number - addition and subtraction			
Year 4	add and subtract numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where appropriate	Year 4	1.20, 1.21, 1.22
Year 4	estimate and use inverse operations to check answers to a calculation	Year 4	1.20, 1.21, 1.22
Year 4	solve addition and subtraction two-step problems in contexts, deciding which operations and methods to use and why.	Year 4	1.20, 1.21, 1.22
Year 4	Pupils continue to practise both mental methods and columnar addition and subtraction with increasingly large numbers to aid fluency (see Mathematics Appendix 1)	Year 4	1.20, 1.21, 1.22
Number - multiplication and division			
Year 4	recall multiplication and division facts for multiplication tables up to 12×12	Year 4	Daily fluency 2.8, 2.9, 2.11
Year 4	use place value, known and derived facts to multiply and divide mentally, including: multiplying by 0 and 1; dividing by 1; multiplying together three numbers	Year 5	2.14, 2.15

MATHS CURRICULUM

Year 4	recognise and use factor pairs and commutativity in mental calculations	Year 5	2.14
Year 4	multiply two-digit and three-digit numbers by a one-digit number using formal written layout	Year 5	2.14
Year 4	solve problems involving multiplying and adding, including using the distributive law to multiply two digit numbers by one digit, integer scaling problems and harder correspondence problems such as n objects are connected to m objects.	Year 4 Year 5 Year 6	2.10 2.17 2.27
Year 4	Pupils continue to practise recalling and using multiplication tables and related division facts to aid fluency.	Year 4	Daily fluency 2.8, 2.9, 2.11
Year 4	Pupils practise mental methods and extend this to three-digit numbers to derive facts, (for example $600 \div 3 = 200$ can be derived from $2 \times 3 = 6$)	Year 5	2.14, 2.15
Year 4	Pupils practise to become fluent in the formal written method of short multiplication and short division with exact answers (see Mathematics Appendix 1).	Year 5	2.14, 2.15
Year 4	Pupils write statements about the equality of expressions (for example, use the distributive law $39 \times 7 = 30 \times 7 + 9 \times 7$ and associative law $(2 \times 3) \times 4 = 2 \times (3 \times 4)$). They combine their knowledge of number facts and rules of arithmetic to solve mental and written calculations for example, $2 \times 6 \times 5 = 10 \times 6 = 60$.	Year 4	2.10
Year 4	Pupils solve two-step problems in contexts, choosing the appropriate operation, working with increasingly harder numbers. This should include correspondence questions such as the numbers of choices of a meal on a menu, or three cakes shared equally between 10 children.	Year 6	2.27
Number - fractions			
Year 4	recognise and show, using diagrams, families of common equivalent fractions	Year 5	3.7
Year 4	count up and down in hundredths; recognise that hundredths arise when dividing an object by one hundred and dividing tenths by ten.	Year 5	1.23, 1.24
Year 4	solve problems involving increasingly harder fractions to calculate quantities, and fractions to divide quantities, including non-unit fractions where the answer is a whole number	Year 5	3.6
Year 4	add and subtract fractions with the same denominator	Year 4	3.5
Year 4	recognise and write decimal equivalents of any number of tenths or hundredths	Year 5	1.23, 1.24
Year 4	recognise and write decimal equivalents to $1/4$, $1/2$, $3/4$	Year 5	3.7
Year 4	find the effect of dividing a one- or two-digit number by 10 and 100, identifying the value of the digits in the answer as ones, tenths and hundredths	Year 5	2.29
Year 4	round decimals with one decimal place to the nearest whole number	Year 5	1.23, 1.24
Year 4	compare numbers with the same number of decimal places up to two decimal places	Year 5	1.23, 1.24
Year 4	solve simple measure and money problems involving fractions and decimals to two decimal places	Year 5	1.23, 1.24
Year 4	Pupils should connect hundredths to tenths and place value and decimal measure.	Year 5	1.23
Year 4	They extend the use of the number line to connect fractions, numbers and measures.	Year 4	3.5
Year 4	Pupils understand the relation between non-unit fractions and multiplication and division of quantities, with particular emphasis on tenths and hundredths.	Year 5	1.23, 1.24
Year 4	Pupils make connections between fractions of a length, of a shape and as a representation of one whole or set of quantities.	Year 3	3.2, 3.3
Year 4	Pupils use factors and multiples to recognise equivalent fractions and simplify where appropriate (for example, $6/9 = 2/3$ or $1/4 = 2/8$).	Year 5	3.7

MATHS CURRICULUM

Year 4	Pupils continue to practise adding and subtracting fractions with the same denominator, to become fluent through a variety of increasingly complex problems beyond one whole.	Year 4	3.5
Year 4	Pupils are taught throughout that decimals and fractions are different ways of expressing numbers and proportions.	Year 5	1.23, 1.24
Year 4	Pupils' understanding of the number system and decimal place value is extended at this stage to tenths and then hundredths. This includes relating the decimal notation to division of whole number by 10 and later 100.	Year 5	1.23, 1.24
Year 4	They practise counting using simple fractions and decimals, both forwards and backwards.	Year 4	Daily counting
Year 4	Pupils learn decimal notation and the language associated with it, including in the context of measurements. They make comparisons and order decimal amounts and quantities that are expressed to the same number of decimal places. They should be able to represent numbers with one or two decimal places in several ways, such as on number lines.	Year 5	1.23, 1.24
Measurement			
Year 4	convert between different units of measure [for example, kilometre to metre; hour to minute]	Year 4	Time
Year 4	measure and calculate the perimeter of a rectilinear figure (including squares) in centimetres and metres	Year 4	2.16
Year 4	find the area of rectilinear shapes by counting squares	Year 5	2.16
Year 4	estimate, compare and calculate different measures, including money in pounds and pence	Year 5	1.25
Year 4	read, write and convert time between analogue and digital 12- and 24-hour clocks	Year 4	Time
Year 4	solve problems involving converting from hours to minutes; minutes to seconds; years to months; weeks to days	Year 4	Time
Year 4	Pupils build on their understanding of place value and decimal notation to record metric measures, including money.	Year 5	1.25
Year 4	They use multiplication to convert from larger to smaller units.	Year 5	2.29
Year 4	Perimeter can be expressed algebraically as $2(a + b)$ where a and b are the dimensions in the same unit.	Year 4	2.16
Year 4	They relate area to arrays and multiplication.	Year 5	2.16
Geometry - properties of shape			
Year 4	compare and classify geometric shapes, including quadrilaterals and triangles, based on their properties and sizes	Year 4	2.16
Year 4	identify acute and obtuse angles and compare and order angles up to two right angles by size	Year 5	Angles
Year 4	identify lines of symmetry in 2-D shapes presented in different orientations	Year 4	Symmetry in 2D
Year 4	complete a simple symmetric figure with respect to a specific line of symmetry.	Year 4	Symmetry in 2D
Year 4	Pupils continue to classify shapes using geometrical properties, extending to classifying different triangles (for example, isosceles, equilateral, scalene) and quadrilaterals (for example, parallelogram, rhombus, trapezium).	Year 4	2.16
Year 4	Pupils compare and order angles in preparation for using a protractor	Year 4	2.16
Year 4	Pupils draw symmetric patterns using a variety of media to become familiar with different orientations of lines of symmetry; and recognise line symmetry in a variety of diagrams, including where the line of symmetry does not dissect the original shape.	Year 4	Symmetry in 2D
Geometry - position and direction			

MATHS CURRICULUM

Year 4	describe positions on a 2-D grid as coordinates in the first quadrant	Year 4	Co-ordinates
Year 4	describe movements between positions as translations of a given unit to the left/right and up/down	Year 4	Co-ordinates
Year 4	plot specified points and draw sides to complete a given polygon	Year 4	Co-ordinates
Year 4	Pupils draw a pair of axes in one quadrant, with equal scales and integer labels. They read, write and use pairs of coordinates, for example (2, 5), including using coordinate plotting ICT tools	Year 4	Co-ordinates
Statistics			
Year 4	interpret and present discrete and continuous data using appropriate graphical methods, including bar charts and time graphs.	Year 4	Statistics
Year 4	solve comparison, sum and difference problems using information presented in bar charts, pictograms, tables and other graphs	Year 4	Statistics
Year 4	Pupils understand and use a greater range of scales in their representations.	Year 4	Statistics
Year 4	Pupils begin to relate the graphical representation of data to recording change over time.	Year 4	Statistics

MATHS CURRICULUM

Year 5

The following table lists all year 5 national curriculum attainment targets and non statutory notes organised into national curriculum strands. The columns to the right indicate when and where the statements are taught. **Red** is used to indicate a statement that is not taught in year 5.

NC Year	NC Statement	GLF Year	GLF Unit
Number - number and place value			
Year 5	read, write, order and compare numbers to at least 1 000 000 and determine the value of each digit	Year 6	1.30
Year 5	count forwards or backwards in steps of powers of 10 for any given number up to 1 000 000	Year 6	1.30 Daily counting
Year 5	interpret negative numbers in context, count forwards and backwards with positive and negative whole numbers, including through zero	Year 5	1.27
Year 5	round any number up to 1 000 000 to the nearest 10, 100, 1000, 10 000 and 100 000	Year 6	1.30
Year 5	solve number problems and practical problems that involve all of the above	Year 5 Year 6	1.27 1.30
Year 5	read Roman numerals to 1000 (M) and recognise years written in Roman numerals.	Year X	History
Year 5	Pupils identify the place value in large whole numbers.	Year 6	1.30
Year 5	They continue to use number in context, including measurement. Pupils extend and apply their understanding of the number system to the decimal numbers and fractions that they have met so far.	Year 5	1.23, 1.24
Year 5	They should recognise and describe linear number sequences, including those involving fractions and decimals, and find the term-to-term rule.	Year 5	1.23, 1.24
Year 5	They should recognise and describe linear number sequences (for example, 3, 3 1/2, 4, 4 1/2 ...), including those involving fractions and decimals, and find the term-to-term rule in words (for example, add 1/2).	Year 5 Year 4	1.23, 1.24 3.5
Number - addition and subtraction			
Year 5	add and subtract whole numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction)	Year 6	1.26, 1.30
Year 5	add and subtract numbers mentally with increasingly large numbers	Year 6	1.26, 1.30
Year 5	use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy	Year 6	1.26, 1.30
Year 5	solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why	Year 6	1.26, 1.30
Year 5	Pupils practise using the formal written methods of columnar addition and subtraction with increasingly large numbers to aid fluency (see Mathematics Appendix 1).	Year 6	1.26, 1.30
Year 5	They practise mental calculations with increasingly large numbers to aid fluency (for example, 12 462 – 2300 = 10 162).	Year 6	1.26, 1.30
Number - multiplication and division			
Year 5	identify multiples and factors, including finding all factor pairs of a number, and common factors of two numbers	Year 5	2.21
Year 5	know and use the vocabulary of prime numbers, prime factors and composite (non prime) numbers	Year 5	2.21
Year 5	establish whether a number up to 100 is prime and recall prime numbers up to 19	Year 5	2.21

MATHS CURRICULUM

Year 5	multiply numbers up to 4 digits by a one- or two-digit number using a formal written method, including long multiplication for two-digit numbers	Year 5	2.14
Year 5	multiply and divide numbers mentally drawing upon known facts	Year 5	2.14, 2.15
Year 5	divide numbers up to 4 digits by a one-digit number using the formal written method of short division and interpret remainders appropriately for the context	Year 5	2.14, 2.15
Year 5	multiply and divide whole numbers and those involving decimals by 10, 100 and 1000	Year 5	2.29
Year 5	recognise and use square numbers and cube numbers, and the notation for squared (2) and cubed (3)	Year 5	2.21
Year 5	solve problems involving multiplication and division including using their knowledge of factors and multiples, squares and cubes	Year 5	2.21
Year 5	solve problems involving addition, subtraction, multiplication and division and a combination of these, including understanding the meaning of the equals sign	Year 6	2.22, 2.28
Year 5	solve problems involving multiplication and division, including scaling by simple fractions and problems involving simple rates	Year 5	2.17
Year 5	Pupils practise and extend their use of the formal written methods of short multiplication and short division (see Mathematics Appendix 1). They apply all the multiplication tables and related division facts frequently, commit them to memory and use them confidently to make larger calculations.	Year 5	2.14, 2.15
Year 5	They use and understand the terms factor, multiple and prime, square and cube numbers.	Year 5	2.21
Year 5	Pupils interpret non-integer answers to division by expressing results in different ways according to the context, including with remainders, as fractions, as decimals or by rounding (for example, $98 \div 4 = 98/4 = 24 \text{ r } 2 = 24 / 21 = 24.5 \approx 25$).	Year 5	2.15
Year 5	Pupils use multiplication and division as inverses to support the introduction of ratio in year 6, for example, by multiplying and dividing by powers of 10 in scale drawings or by multiplying and dividing by powers of a 1000 in converting between units such as kilometres and metres.	Year 5	2.17
Year 5	Distributivity can be expressed as $a(b + c) = ab + ac$.	Year 5	2.14
Year 5	They understand the terms factor, multiple and prime, square and cube numbers and use them to construct equivalence statements (for example, $4 \times 35 = 2 \times 2 \times 35$; $3 \times 270 = 3 \times 3 \times 9 \times 10 = 9^2 \times 10$).	Year 5	2.21
Year 5	Pupils use and explain the equals sign to indicate equivalence, including in missing number problems (for example, $13 + 24 = 12 + 25$; $33 = 5 \times ?$).	Year 6	1.29
Number - fractions			
Year 5	compare and order fractions whose denominators are all multiples of the same number	Year 5	3.7
Year 5	identify, name and write equivalent fractions of a given fraction, represented visually, including tenths and hundredths	Year 5	3.7
Year 5	recognise mixed numbers and improper fractions and convert from one form to the other and write mathematical statements > 1 as a mixed number [for example, $52 \div 4/5 = 6/5 = 1 \frac{1}{5}$]	Year 4	3.5
Year 5	add and subtract fractions with the same denominator and denominators that are multiples of the same number	Year 6	3.8
Year 5	multiply proper fractions and mixed numbers by whole numbers, supported by materials and diagrams	Year 5	3.6
Year 5	read and write decimal numbers as fractions [for example, $0.71 = 71/100$]	Year 5	1.23, 1.24
Year 5	recognise and use thousandths and relate them to tenths, hundredths and decimal equivalents	Year 5	1.23, 1.24
Year 5	round decimals with two decimal places to the nearest whole number and to one decimal place	Year 5	1.23, 1.24

MATHS CURRICULUM

Year 5	read, write, order and compare numbers with up to three decimal places	Year 5	1.23, 1.24
Year 5	solve problems involving number up to three decimal places	Year 5	1.23, 1.24
Year 5	recognise the per cent symbol (%) and understand that per cent relates to 'number of parts per hundred', and write percentages as a fraction with denominator 100, and as a decimal	Year 6	3.10
Year 5	solve problems which require knowing percentage and decimal equivalents of $\frac{1}{2}$, $\frac{1}{4}$, $\frac{1}{5}$, $\frac{2}{5}$, $\frac{4}{5}$ and those fractions with a denominator of a multiple of 10 or 25	Year 6	3.10
Year 5	Pupils should be taught throughout that percentages, decimals and fractions are different ways of expressing proportions.	Year 6	3.10
Year 5	They extend their knowledge of fractions to thousandths and connect to decimals and measures	Year 5	1.23, 1.24
Year 5	Pupils connect equivalent fractions > 1 that simplify to integers with division and other fractions > 1 to division with remainders, using the number line and other models, and hence move from these to improper and mixed fractions.	Year 6	2.24
Year 5	Pupils connect multiplication by a fraction to using fractions as operators (fractions of), and to division, building on work from previous years. This relates to scaling by simple fractions, including fractions > 1 .	Year 5	2.17
Year 5	Pupils practise adding and subtracting fractions to become fluent through a variety of increasingly complex problems. They extend their understanding of adding and subtracting fractions to calculations that exceed 1 as a mixed number.	Year 4	3.5
Year 5	Pupils continue to practise counting forwards and backwards in simple fractions.	Year 5	Daily counting
Year 5	Pupils continue to develop their understanding of fractions as numbers, measures and operators by finding fractions of numbers and quantities.	Year 5	3.6
Year 5	Pupils extend counting from year 4, using decimals and fractions including bridging zero, for example on a number line.	Year 5	Daily counting
Year 5	Pupils say, read and write decimal fractions and related tenths, hundredths and thousandths accurately and are confident in checking the reasonableness of their answers to problems.	Year 5	1.23, 1.24
Year 5	They mentally add and subtract tenths, and one-digit whole numbers and tenths.	Year 5	1.23, 1.24
Year 5	They practise adding and subtracting decimals, including a mix of whole numbers and decimals, decimals with different numbers of decimal places, and complements of 1 (for example, $0.83 + 0.17 = 1$).	Year 5	1.23, 1.24
Year 5	Pupils should go beyond the measurement and money models of decimals, for example, by solving puzzles involving decimals.	Year 5	1.25
Year 5	Pupils should make connections between percentages, fractions and decimals (for example, 100% represents a whole quantity and 1% is $\frac{1}{100}$, 50% is $\frac{50}{100}$, 25% is $\frac{25}{100}$) and relate this to finding 'fractions of'.	Year 6	3.10
Measurement			
Year 5	convert between different units of metric measure (for example, kilometre and metre; centimetre and metre; centimetre and millimetre; gram and kilogram; litre and millilitre)	Year 5	2.29, 5NPV5
Year 5	understand and use approximate equivalences between metric units and common imperial units such as inches, pounds and pints	Year 5	Converting Units
Year 5	measure and calculate the perimeter of composite rectilinear shapes in centimetres and metres	Year 4	2.16
Year 5	calculate and compare the area of rectangles (including squares), and including using standard units, square centimetres (cm^2) and square metres (m^2) and estimate the area of irregular shapes	Year 5	2.16
Year 5	estimate volume [for example, using 1 cm^3 blocks to build cuboids (including cubes)] and capacity	Year 5	2.20

MATHS CURRICULUM

	[for example, using water]		
Year 5	solve problems involving converting between units of time	Year 5	Converting Units
Year 5	use all four operations to solve problems involving measure [for example, length, mass, volume, money] using decimal notation, including scaling.	Year 5	1.23, 1.24
Year 5	Pupils use their knowledge of place value and multiplication and division to convert between standard units.	Year 5	2.29, 5NPV5
Year 5	Pupils calculate the perimeter of rectangles and related composite shapes, including using the relations of perimeter or area to find unknown lengths. Missing measures questions such as these can be expressed algebraically, for example $4 + 2b = 20$ for a rectangle of sides 2 cm and b cm and perimeter of 20cm.	Year 4	2.16
Year 5	Pupils calculate the area from scale drawings using given measurements.	Year 5	2.16
Year 5	Pupils use all four operations in problems involving time and money, including conversions (for example, days to weeks, expressing the answer as weeks and days).	Year 5	Converting Units
Geometry - properties of shape			
Year 5	identify 3-D shapes, including cubes and other cuboids, from 2-D representations	Year 5	Angles
Year 5	know angles are measured in degrees: estimate and compare acute, obtuse and reflex angles	Year 5	Angles
Year 5	draw given angles, and measure them in degrees (o)	Year 5	Angles
Year 5	identify:		
Year 5	angles at a point and one whole turn (total 360o)	Year 5	Angles
Year 5	angles at a point on a straight line and 1/2 a turn (total 180o)	Year 5	Angles
Year 5	other multiples of 90o	Year 5	Angles
Year 5	use the properties of rectangles to deduce related facts and find missing lengths and angles	Year 5	Angles
Year 5	distinguish between regular and irregular polygons based on reasoning about equal sides and angles	Year 4	2.16
Year 5	Pupils become accurate in drawing lines with a ruler to the nearest millimetre, and measuring with a protractor. They use conventional markings for parallel lines and right angles.	Year 5	Angles
Year 5	Pupils use the term diagonal and make conjectures about the angles formed between sides, and between diagonals and parallel sides, and other properties of quadrilaterals, for example using dynamic geometry ICT tools.	Year 5	Angles
Year 5	Pupils use angle sum facts and other properties to make deductions about missing angles and relate these to missing number problems.	Year 5	Angles
Geometry - position and direction			
Year 5	identify, describe and represent the position of a shape following a reflection or translation, using the appropriate language, and know that the shape has not changed	Year 5	Transformations
Year 5	Pupils recognise and use reflection and translation in a variety of diagrams, including continuing to use a 2-D grid and coordinates in the first quadrant. Reflection should be in lines that are parallel to the axes.	Year 5	Transformations
Statistics			
Year 5	solve comparison, sum and difference problems using information presented in a line graph	Year 5	Science
Year 5	complete, read and interpret information in tables, including timetables.	Year 5	Science

MATHS CURRICULUM

Year 5	Pupils connect their work on coordinates and scales to their interpretation of time graphs.	Year 5	Science
Year 5	They begin to decide which representations of data are most appropriate and why.	Year 5	Science

MATHS CURRICULUM

Year 6

The following table lists all year 6 national curriculum attainment targets and non statutory notes organised into national curriculum strands. The columns to the right indicate when and where the statements are taught. Red is used to indicate a statement that is not taught in year 6.

NC Year	NC Statement	GLF Year	GLF Unit
Number - number and place value			
Year 6	read, write, order and compare numbers up to 10 000 000 and determine the value of each digit	Year 6	1.30
Year 6	round any whole number to a required degree of accuracy	Year 6	1.30
Year 6	use negative numbers in context, and calculate intervals across zero	Year 5	1.27
Year 6	solve number and practical problems that involve all of the above	Year 6	1.30
Year 6	Pupils use the whole number system, including saying, reading and writing numbers accurately.	Year 6	1.30
Number - addition and subtraction, multiplication and division			
Year 6	multiply multi-digit numbers up to 4 digits by a two-digit whole number using the formal written method of long multiplication	Year 6	2.23
Year 6	divide numbers up to 4 digits by a two-digit whole number using the formal written method of long division, and interpret remainders as whole number remainders, fractions, or by rounding, as appropriate for the context	Year 6	2.24
Year 6	divide numbers up to 4 digits by a two-digit number using the formal written method of short division where appropriate, interpreting remainders according to the context	Year 6	2.24
Year 6	perform mental calculations, including with mixed operations and large numbers	Year 6	1.30, 2.23, 2.24
Year 6	identify common factors, common multiples and prime numbers	Year 5	2.21
Year 6	use their knowledge of the order of operations to carry out calculations involving the four operations	Year 6	2.22, 2.28
Year 6	solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why	Year 6	1.30, 2.23, 2.24
Year 6	solve problems involving addition, subtraction, multiplication and division	Year 6	1.30, 2.23, 2.24
Year 6	use estimation to check answers to calculations and determine, in the context of a problem, an appropriate degree of accuracy.	Year 6	1.30, 2.23, 2.24
Year 6	Pupils practise addition, subtraction, multiplication and division for larger numbers, using the formal written methods of columnar addition and subtraction, short and long multiplication, and short and long division (see Mathematics Appendix 1).	Year 6	1.30, 2.23, 2.24
Year 6	They undertake mental calculations with increasingly large numbers and more complex calculations.	Year 6	1.30, 2.23, 2.24
Year 6	Pupils continue to use all the multiplication tables to calculate mathematical statements in order to maintain their fluency.	Year 6	Daily fluency
Year 6	Pupils round answers to a specified degree of accuracy, for example, to the nearest 10, 20, 50 etc., but not to a specified number of significant figures.	Year 6	1.30
Year 6	Pupils explore the order of operations using brackets; for example, $2 + 1 \times 3 = 5$ and $(2 + 1) \times 3 = 9$.	Year 6	2.22, 2.28
Year 6	Common factors can be related to finding equivalent fractions	Year 5	3.8
Number - fractions			

MATHS CURRICULUM

Year 6	use common factors to simplify fractions; use common multiples to express fractions in the same denominator	Year 6	3.8
Year 6	compare and order fractions, including fractions > 1	Year 6	3.8
Year 6	add and subtract fractions with different denominators and mixed numbers, using the concept of equivalent fractions	Year 6	3.8
Year 6	multiply simple pairs of proper fractions, writing the answer in its simplest form [for example, $\frac{1}{4} \times \frac{1}{2} = \frac{1}{8}$]	Year 6	3.9
Year 6	divide proper fractions by whole numbers [for example, $\frac{1}{3} \div 2 = \frac{1}{6}$]	Year 6	3.9
Year 6	associate a fraction with division and calculate decimal fraction equivalents [for example, 0.375] for a simple fraction [for example, $\frac{3}{8}$]	Year 6	3.10
Year 6	identify the value of each digit in numbers given to three decimal places and multiply and divide numbers by 10, 100 and 1000 giving answers up to three decimal places	Year 5	2.29
Year 6	multiply one-digit numbers with up to two decimal places by whole numbers	Year 5	2.19
Year 6	use written division methods in cases where the answer has up to two decimal places	Year 6	2.24
Year 6	solve problems which require answers to be rounded to specified degrees of accuracy	Year 6	2.24
Year 6	recall and use equivalences between simple fractions, decimals and percentages, including in different contexts.	Year 6	3.10
Year 6	Pupils should practise, use and understand the addition and subtraction of fractions with different denominators by identifying equivalent fractions with the same denominator. They should start with fractions where the denominator of one fraction is a multiple of the other (for example, $\frac{1}{2} + \frac{1}{8} = \frac{5}{8}$) and progress to varied and increasingly complex problems.	Year 6	3.8
Year 6	Pupils should use a variety of images to support their understanding of multiplication with fractions. This follows earlier work about fractions as operators (fractions of), as numbers, and as equal parts of objects, for example as parts of a rectangle.	Year 6	3.9
Year 6	Pupils use their understanding of the relationship between unit fractions and division to work backwards by multiplying a quantity that represents a unit fraction to find the whole quantity (for example, if $\frac{1}{4}$ of a length is 36cm, then the whole length is $36 \times 4 = 144$ cm).	Year 5	3.6
Year 6	They practise calculations with simple fractions and decimal fraction equivalents to aid fluency, including listing equivalent fractions to identify fractions with common denominators.	Year 6	3.8, 3.10
Year 6	Pupils can explore and make conjectures about converting a simple fraction to a decimal fraction (for example, $3 \div 8 = 0.375$). For simple fractions with recurring decimal equivalents, pupils learn about rounding the decimal to three decimal places, or other appropriate approximations depending on the context. Pupils multiply and divide numbers with up to two decimal places by one-digit and two-digit whole numbers. Pupils multiply decimals by whole numbers, starting with the simplest cases, such as $0.4 \times 2 = 0.8$, and in practical contexts, such as measures and money.	Year 5	2.19
Year 6	Pupils are introduced to the division of decimal numbers by one-digit whole number, initially, in practical contexts involving measures and money. They recognise division calculations as the inverse of multiplication.	Year 5	2.19
Year 6	Pupils also develop their skills of rounding and estimating as a means of predicting and checking the order of magnitude of their answers to decimal calculations. This includes rounding answers to a specified degree of accuracy and checking the reasonableness of their answers.	Year 5	2.19
Ratio and Proportion			
Year 6	solve problems involving the relative sizes of two quantities where missing values can be found by using integer multiplication and division facts	Year 6	2.27
Year 6	solve problems involving the calculation of percentages [for example, of measures, and such as 15%	Year 6	2.27

MATHS CURRICULUM

	of 360] and the use of percentages for comparison		
Year 6	solve problems involving similar shapes where the scale factor is known or can be found	Year 6	2.27
Year 6	solve problems involving unequal sharing and grouping using knowledge of fractions and multiples.	Year 6	2.27
Year 6	Pupils recognise proportionality in contexts when the relations between quantities are in the same ratio (for example, similar shapes and recipes).	Year 6	2.27
Year 6	Pupils link percentages or 360° to calculating angles of pie charts.	Year 6	2.27
Year 6	Pupils should consolidate their understanding of ratio when comparing quantities, sizes and scale drawings by solving a variety of problems. They might use the notation a:b to record their work.	Year 6	2.27
Year 6	Pupils solve problems involving unequal quantities, for example, 'for every egg you need three spoonfuls of flour', '3/5 of the class are boys'. These problems are the foundation for later formal approaches to ratio and proportion	Year 6	2.27
Algebra			
Year 6	use simple formulae	Year 6	Revision
Year 6	generate and describe linear number sequences	Year 6	Revision
Year 6	express missing number problems algebraically	Year 6	Revision 1.31
Year 6	find pairs of numbers that satisfy an equation with two unknowns	Year 6	Revision 1.31
Year 6	enumerate possibilities of combinations of two variables.	Year 6	Revision 1.31
Year 6	Pupils should be introduced to the use of symbols and letters to represent variables and unknowns in mathematical situations that they already understand, such as: -missing numbers, lengths, coordinates and angles -formulae in mathematics and science -equivalent expressions (for example, $a + b = b + a$) -generalisations of number patterns -number puzzles (for example, what two numbers can add up to)	Year 6	Revision 1.31
Measurement			
Year 6	solve problems involving the calculation and conversion of units of measure, using decimal notation up to three decimal places where appropriate	Year 5	2.29, 5NPV5
Year 6	use, read, write and convert between standard units, converting measurements of length, mass, volume and time from a smaller unit of measure to a larger unit, and vice versa, using decimal notation to up to three decimal places	Year 5	2.29, 5NPV5
Year 6	convert between miles and kilometres	Year 5	Converting units
Year 6	recognise that shapes with the same areas can have different perimeters and vice versa	Year 5	2.16
Year 6	recognise when it is possible to use formulae for area and volume of shapes	Year 5	2.16, 2.20
Year 6	calculate the area of parallelograms and triangles	Year 5	2.16
Year 6	calculate, estimate and compare volume of cubes and cuboids using standard units, including cubic centimetres (cm ³) and cubic metres (m ³), and extending to other units [for example, mm ³ and km ³].	Year 5	2.20
Year 6	Pupils connect conversion (for example, from kilometres to miles) to a graphical representation as preparation for understanding linear/proportional graphs.	Year 5	Converting units
Year 6	They know approximate conversions and are able to tell if an answer is sensible.	Year 5	Converting units

MATHS CURRICULUM

Year 6	Using the number line, pupils use, add and subtract positive and negative integers for measures such as temperature.	Year 5	1.27
Year 6	They relate the area of rectangles to parallelograms and triangles, for example, by dissection, and calculate their areas, understanding and using the formulae (in words or symbols) to do this.	Year 5	2.16
Year 6	Pupils could be introduced to compound units for speed, such as miles per hour, and apply their knowledge in science or other subjects as appropriate	Year 6	Science
Geometry - properties of shape			
Year 6	draw 2-D shapes using given dimensions and angles	Year 6	Draw, Compose, Decompose Shapes
Year 6	recognise, describe and build simple 3-D shapes, including making nets	Year 6	Draw, Compose, Decompose Shapes
Year 6	compare and classify geometric shapes based on their properties and sizes and find unknown angles in any triangles, quadrilaterals, and regular polygons	Year 6	Draw, Compose, Decompose Shapes
Year 6	illustrate and name parts of circles, including radius, diameter and circumference and know that the diameter is twice the radius	Year 6	Statistics
Year 6	recognise angles where they meet at a point, are on a straight line, or are vertically opposite, and find missing angles.	Year 6	Draw, Compose, Decompose Shapes
Year 6	Pupils draw shapes and nets accurately, using measuring tools and conventional markings and labels for lines and angles.	Year 6	Draw, Compose, Decompose Shapes
Year 6	Pupils describe the properties of shapes and explain how unknown angles and lengths can be derived from known measurements.	Year 6	Draw, Compose, Decompose Shapes
Year 6	These relationships might be expressed algebraically for example, $d = 2 \times r$; $a = 180 - (b + c)$.	Year 6	Draw, Compose, Decompose Shapes Algebra
Geometry - position and direction			
Year 6	describe positions on the full coordinate grid (all four quadrants)	Year 6	Position & Direction
Year 6	draw and translate simple shapes on the coordinate plane, and reflect them in the axes.	Year 6	Position & Direction
Year 6	Pupils draw and label a pair of axes in all four quadrants with equal scaling. This extends their knowledge of one quadrant to all four quadrants, including the use of negative numbers.	Year 6	Position & Direction
Year 6	Pupils draw and label rectangles (including squares), parallelograms and rhombuses, specified by coordinates in the four quadrants, predicting missing coordinates using the properties of shapes. These might be expressed algebraically for example, translating vertex (a, b) to (a - 2, b + 3); (a, b) and (a + d, b + d) being opposite vertices of a square of side d.	Year 6	Position & Direction
Statistics			
Year 6	interpret and construct pie charts and line graphs and use these to solve problems	Year 6	Statistics
Year 6	calculate and interpret the mean as an average.	Year 6	Statistics 2.26
Year 6	Pupils connect their work on angles, fractions and percentages to the interpretation of pie charts.	Year 6	Statistics
Year 6	Pupils both encounter and draw graphs relating two variables, arising from their own enquiry and in other subjects.	Year 6	Statistics
Year 6	They should connect conversion from kilometres to miles in measurement to its graphical representation.	Year 6	Statistics

MATHS CURRICULUM

Year 6	Pupils know when it is appropriate to find the mean of a data set	Year 6	Statistics 2.26
