

Gawber Geography and our Key Drivers

Our Key Drivers		
Curiosity 	<i>We have enquiring minds</i>	Children at Gawber are encouraged to be curious about the world that we live in. The curriculum is designed to inspire curiosity of the area that they live in before broadening their knowledge about the wider world. Children are encouraged to think about their role in the world and how they can make a positive change.
Respect 	<i>We have increasing self-esteem. We respect ourselves, others and the environment</i>	Children at Gawber encouraged to be the change they want to see in the world. Throughout the Gawber Geography curriculum, they explore diverse places, people and environments, building their knowledge and respect for the world.
Independence 	<i>We have the skills to succeed</i>	By the time children leave Gawber school, children at Gawber are knowledgeable in the part that they can play to making a positive change in the world.
Collaboration 	<i>We can work well together</i>	Children are given lots of opportunities to work collaboratively to discover more about our world. They not only work with other peers but with the wider community.
Aspiration 	<i>We achieve high standards in all areas of the 21st century curriculum</i>	Children at Gawber aspire to be the positive change that our world needs to see. They are given the tools they need to ensure that they grow up knowing that they have the power to change the world!
Resilient 	<i>We seek to build resilience through a focus on wellbeing for mind, body and spirit</i>	Gawber children learn that it is not always easy to find the answer that we are searching for in Geography. They know that they must be patient, particularly in fieldwork techniques, to gain the data they are searching for. The focus on environmental awareness helps our children to understand how building a better future can impact their mental and physical wellbeing.
Creativity 	<i>We think creatively and meet new challenges with a smile</i>	Children are always encouraged to take responsibility for their learning and to enjoy learning about the world that they live in. Residential and school trips really encourage our children to have a hands-on geographical experience and inspire their love for our world.
