

Hello Terrific Tigers,

Hope you have enjoyed watching, reading and writing quest myths.

Here are some ideas for next week (week commencing 4th May).

A new learning platform called 'The Oak Academy' has been launched with virtual lessons that look interesting. These lessons have a virtual teacher and resources to support you when completing the tasks. They also discuss answers so this is something that you should be able to do fairly independently so that your adults can do other important tasks. I have especially enjoyed looking at their English Activities in Week One where the aim has been to write a set of instructions to build Britain's brand new Digital Key Worker - Co-Bot. This flatpack hero will work tirelessly to help your family with daily tasks. I could certainly do with one of those! Lessons can be found at

<https://www.thenational.academy/online-classroom/year-3/english#subjects>

On the same website, they have started a topic on Henry VIII about why he marries six times and his relationship with the church. We were meant to do this in the final weeks before we should have broken up for Easter but didn't get chance so I thought this might be fun as I know how much you enjoyed learning about Henry. These lessons are under the Year 4 curriculum but I'm sure you will be able to do this. The first lesson is at

<https://www.thenational.academy/online-classroom/year-3/english#subjects> and a second lesson is on for later on in the week.

You could also look at the Year 3 lesson on Plants - <https://www.thenational.academy/year-3/foundation/parts-and-function-of-a-plant-year-3-wk2-3> Perhaps you could set up the same experiment at home and see if your results are the same as Miss Roberts.

There are also lessons on Spanish and music on this site if you fancy something a bit different.

The maths lessons on the White Rose site over the next two weeks are looking at money and multiplication and division (<https://whiterosemaths.com/homelearning/year-3/>). Try putting some of these things into real life situations for example, if it costs £2.50 to make 12 buns, how much would it cost to make 36 buns? A cinema ticket costs £14. How much would it cost for 4 cinema tickets?

Hope you have fun with these. Remember, you can do a lot of these activities independently. Impress your adults by showing them what you already know and how brilliant you are at learning new things on your own.

Take care and stay safe.

Mrs Duck.
